**EL Marketing & Design Accessibility**

EL Marketing & Design is committed to website accessibility and this website has been constructed to meet the spirit of the Level Two recommendations made by the W3C Web Content Accessibility, Guidelines, and some of the checkpoints from Level Three.

**Supported browsers**

We endeavour to make our website as widely available as possible, however, there might be some instances where it isn't fully functional.

Here are the browsers and devices on which our website is optimised.

Desktop browsers
Internet Explorer (Versions 11, 10, 9)
Google Chrome
Firefox
Safari (Version 7 and above)

Mobile operating systems
iOS 8 and above
Android 4.4 and above
Windows 8

**Listening to our website**

Most operating systems include software that will read text aloud. Screen reading software will work with most pages on the EL Marketing & Design website.

**Page loading times**

We continuously monitor the performance of our website, and make every effort to make the loading time as fast at possible. However there may be occasions when toy notice some changes in speed which are our of our control. Factors which may affect the speed of the website are the performance of your internet service provider, the amount of traffic on the web at one time and your connection speed.

**Screen resolution**

Our website is designed to fit most screen resolutions and mobile devices. We recommend a resolution of 1280 x 1024 or higher for desktop users.

**General information**

We've designed this site with accessibility in mind. Some of the general features include the use of clear, simple language which is easy to understand. The use of common web conventions, avoiding the use of blinking or flickering elements and the use of validated HTML and cascading style sheets (CSS).

**Background, text and colour**

Careful use of text colours, size and background colours can help people with a range of visual impairments.

While we've used clear, legible font for all text and headings you can adjust sizing in your browser. For example, in the Firefox browser, select view, then text size, and then choose increase, or decrease.

**Links and navigation**

Structuring a website so it is simple and streamlined to use helps to improve the experience for all. For example, placing page items in a logical order and making the website easy to navigate helps people with visual impairments, motor deficiencies and cognitive disabilities. We've made navigation links consistent between pages throughout the site.

**Changes to this policy**

We may edit this policy at any time. This Privacy Policy was created on **Saturday 3rd October 2020**. If we modify this policy the date of modification will be noted in this section of the policy.
